WORK EXPERIENCE

- Architect, at InMobi at Bangalore, India. From November 2010 to Present:
 - Responsible for the internal portal used by business teams for managing ads.
 - Responsible for ad selection component software of the ad network, in transition.
 - Responsible, in a team, for setting the process and work-flows in using the version control system, build systems, building automated testing suite and continuous integration.
 - Responsible for infusing the Agile culture and increasing the Python language usage across the org.
 - Job responsibility involves both to architect the systems rightly and delivery of the software, engaging with the QA, development and deployment teams.
 - Developed POC for transitioning the customer facing portal from Java to Python technologies.
- Partner, at Agiliq Solutions at Hyderabad, India. From February 2009 to September 2010:
 - At Agiliq, we bootstrapped and built, a consulting firm for web development using Django and Python. We offered development to many in the international django consulting space, in a small team.
 - Other than development, we used to also deploy, monitor and maintain, by engaging in sysadmin tasks deploying apps on Amazon EC2, Google App Engine, Linode, Slicehost, dotcloud, ep.io and other VPS.
 - Successfully lead, distributed teams of developers and designers and engaged with other vendors to deliver the product to the client satisfaction.
 - Built many closed source apps using third party API's including twitter, facebook, paypal, youtube, linkedin.
 - Developed several django pluggable applications, and open sourced a few including the famous django-SocialAuth, the first of its kind.
- Senior Software Engineer, at Oracle India at Bangalore, India. From May 2008 to February 2009:
 - Worked on JD Edwards Enterprise One, ERP system in interoperability with Oracle Fusion Middleware using web services. - I was awarded for developing a clean framework for interoperability in record time.
- Software Engineer, at Infosys Technologies at Bangalore/Mysore, India. From Nov 2006 to May 2008:
 - Built an automated testing suite using QTP for the British Telecom provisioning system. - The framework built was incorporated org (BU) wide, as a standard then, for automated tests.
 - Built a internal portal for "Swapping the location allocated to trainees" for use in our batch of 1000 trainees, that was enhanced and standardised to be actually used subsequently.

NOTABLE PUBLICATIONS

- My article on using django on AppEngine is linked to, by the Google AppEngine Team, on their blog. ^[4]
- My Python wrapper for the bing API is linked to, by the Microsoft Bing team, on their blog. ^[3]
- Co-Authoring an e-book on "Django design Patterns." ^[2]

NOTABLE PRESENTATIONS

- Presenting at Great Indian Developer Summit '11 on "djangoic approach to implement common web development paradigms" at IISC, on April 20. ^[10]
- Presented at Pycon India 2010, on "Paradigms of Web Development and comparison of development approaches using Google App Engine and Django."

- Presented at Great Indian Developer Summit, 2010 on “Building pluggable web applications using django.”
- Presented at Foss.in, 2009 on “Django’s internals and how to use Python Meta classes to do magic.” ^[9]
- Presented at “Pecha Kucha Nights, Hyderabad”, on “Hackers and Painters.”

EDUCATIONAL INFORMATION

- Graduated in E&C engineering at Visveswaraiah Technological University at Malnad College of Engineering, Hassan with distinction in year ‘06.

CONVERSANT TECHNOLOGY STACK

- MySQL, Postgres and SQLite for database.
- nginx/apache/memcache/redis deployed on Ubuntu servers for deploying.
- All major open source packages in python, django including Pinax, the django reuseable framework.

OTHER RELEVANT INFORMATION

- Active user of Stackoverflow, a programming community. Among the top 4% of all users in reputation. ^[8]
- Actively involved in the development of Django web framework. Also track the development of: Flask, pip, iPython and bPython consoles.
- Passionate about right version controlling and an expert in Git Version Control System. Currently writing a book on Git to be available at gitcommit.com.
- Love functional programming, Clojure is an actively pursued interest. - Implemented a simple POS, in Excel using builtin functions. ^[11]
